

Planetary Aspects (Drishti) and Effects

By Arpita Nath · How to Read a Chart · 2026-07-28

In Vedic Astrology (Jyotish), planets do not only affect the specific house they are sitting in - they also "look at" and influence other houses in your birth chart (Kundli). This cosmic sight or glance is called Graha Drishti (Planetary Aspect).

When a planet aspects a house or another planet, it projects its natural energy, traits and agenda into that area of your life - sometimes blessing it, and other times challenging it.

The Core Rules of Planetary Aspects

1. Count the House as "1": When counting aspects, always start counting from the house where the planet is currently sitting.

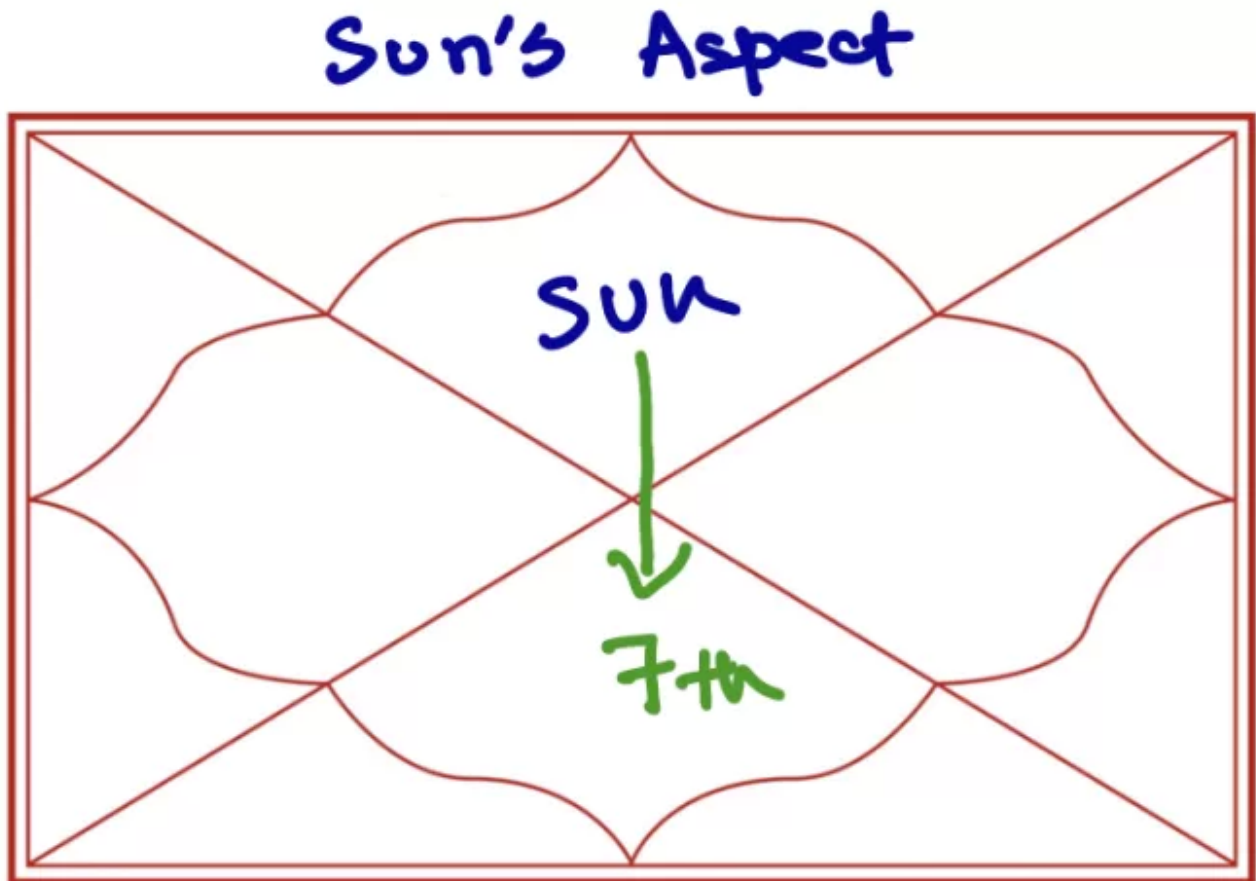

2. The Universal 7th Aspect: Every single planet casts a full 100% aspect on the 7th house

directly across from it.

3. Special Aspects (Vishesh Drishti): Three planets - Mars, Jupiter and Saturn possess additional special full aspects because of their immense cosmic roles.

Every Planet's Aspect Details

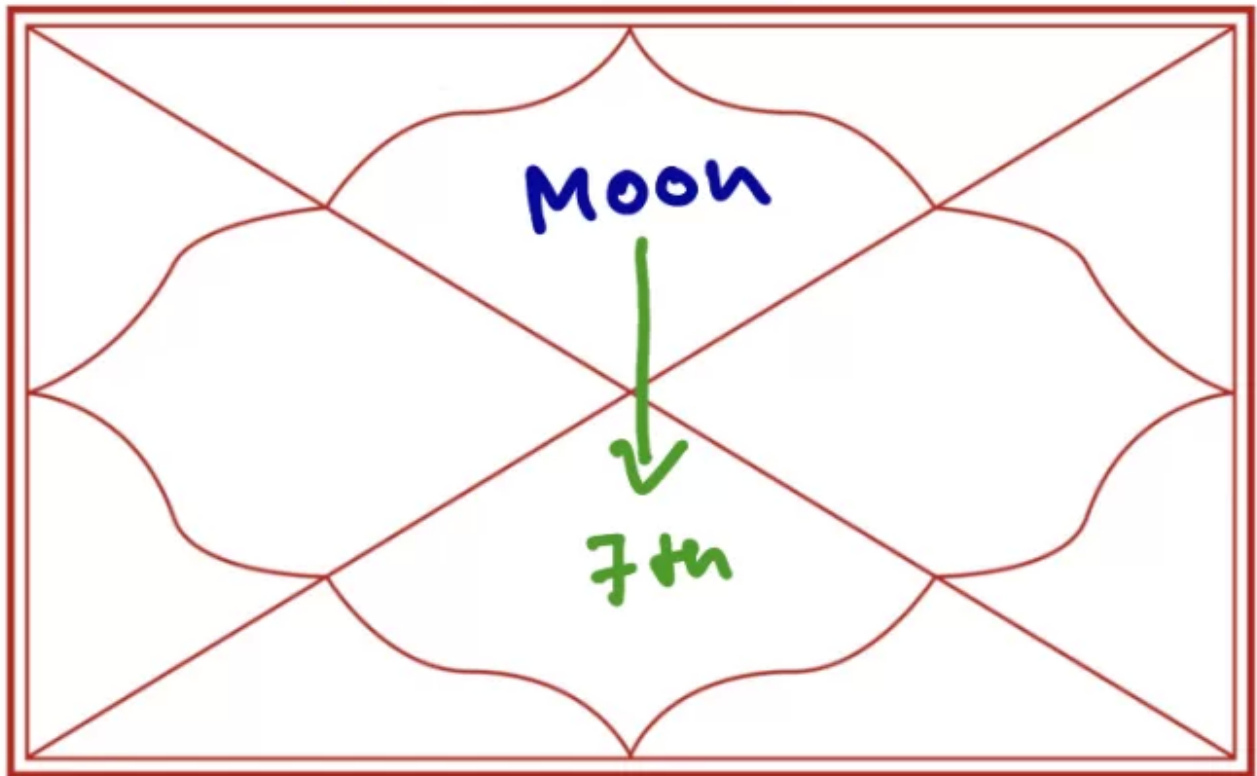

1. Surya (The Sun)

- **Full Aspect (100%):** 7th House
- **Nature of Aspect:** Brings heat, focus, authority and ego to the 7th house from its position. It illuminates that house but can burn or create power dynamics in sensitive areas.
